

## Workshop 1- Parking Place

### 1. Why we want to change it:

The place is dirty and broken, and it needs to be redesigned. The parking lots aren't comfortable because you can't see anything while you're driving into the parking spot. To change the place to something else, it would be better for the environment, because we have to protect our world. If we make it this way, the air there will be much better and for the people that live there, it would be nicer.

**INNOVATION NOW!**

### 2. How we change it:

We want to replace the parking lots into a park to make it greener, because there is no green space in the area. We are planting trees, flowers and grass, to make the air and the view better. Putting benches there with a book box and some bicycle stands, will make it way more interesting. But to make the animals a part of our human life, we put pet bowls next to the tree, so they can strengthen themselves. To place a Water dispenser into the park, it would be nice for the people because they don't have to pay for it, and in this way people don't use plastic, so it's an advantage for the environment.

### 3. *The benefits for the inhabitants:*

The location would become a new meeting point for the people, because

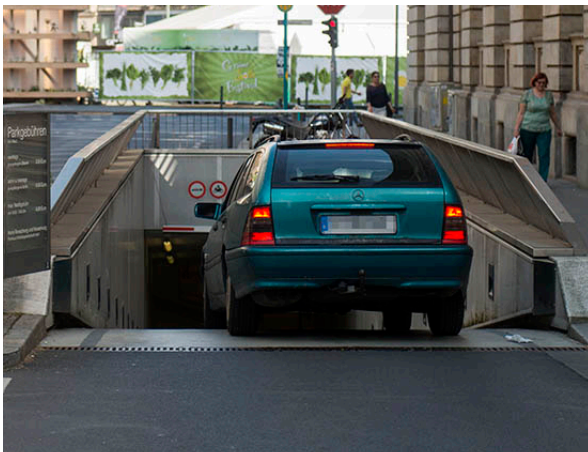

- they can read, that's why we put there the book box and the benches.
- they can relax with their animals, that's why we decided to put pet bowls there.

- we put a chain of lights between the trees, which lights up itself at the evening, so people can also be there at night.

- the bicycle stand also motivates the people to use their bikes, which is also good for making the world more environmentally-friendly.

### 4. *Disadvantages of our project:*

There's no place to put the car, but we can build a parking place under the ground or just outside the city; then the inhabitants of Rottweil have to walk. The solution to put the parking places under the park would be great for the inhabitants but not for the environment. To put the parking places outside of the city, would mean to have better air there.
