

Park at the Hochturm

The park at the Hochturm is very old and the place doesn't look very pretty. There is not much you can do there, except sitting on an old bench and watching at the old and empty fountain. The trees are bold and there is so much space for something useful.

The "Mädchenbrunnen"

This is why we want to change it.

The benches are going to be half circles made out of wood around the new fountain, which is going to be smaller and prettier. There are going to be recycling trashbins for a cleaner place. We also offer a bookshelf so the people can read while they are there.

Before

After

A great feature is going to be a community garden, it is open for everyone, so you can plant for example potatoes with your friends. Another thing is a drink water fountain for you and your dog. The lamps are going to be changed with solar system lamps so it's more economic. At the hills, so where you can't really sit, we're going to plant wild flowers for the bees. And in the middle of the place, we're going to put instead of the old fountain a newer and smaller one. It is going to be a spring fountain. Also we're removing the stairs to the garden and putting there some stairs that look old and put there some led lights. Because we want to combine old and new.
